3D Printing

## EDUCATION

2020 - ?

**DUT Networks and Telecommunications (R&T)**

IUT of Belfort-Montbéliard · Site of Montbéliard

2017 - 2020

**Baccalauréat S, option Engineering Sciences**

Lycée Polyvalent Lumière · Luxeuil-Les-Bains

2012 - 2016

**Diplôme National du Brevet, mention Bien**

Collège Albert Jacquard · Lure

## EXPERIENCES • PROJECTS

### Creation of a clock based on Nixie tubes

2020-?

Using a 3D printer, I made a clock based on Nixie tubes by making the box containing the printed circuits that we make to then, via an Arduino, to be able to display and modify the current time in these displays.

### Connected Hive · Supervised Multi-Technical Project

2019-2020

Lycée Polyvalent Lumière · Luxeuil-Les-Bains

In a team of three people, we had to build a beehive connected to the smartphone via bluetooth with the material provided (Arduino, sensors, etc...).

### Creation of rockets and homemade fuel

2017-2019

When I was in high school, we used to get together with friends to 3D print small rockets, make the fuel and get them off the ground.

## QUALITIES

Productive

Motivated

Imaginative
